### Indications

--Weigh your pet and calculate the dose to administer. --Open the plastic pot. --Using one of the measuring spoons (1 g for 2.5 kg of weight or 4 g for 10 kg of weight), sprinkle the required amount of Prorenal® CKD Px over the pet's food. --Offer the food to the pet. Prorenal® CKD Px has a pleasant taste.

### Dosage and Administration

It is administered orally sprinkled or mixed with food, according to the weight of the pet, at a rate of 1 g per 2.5 kg, once a day. To facilitate administration, Prorenal® CKD Px is offered together with two measuring spoons: one of 1 g (enough for 2.5 kg of body weight) and one of 4 g (enough for 10 kg of body weight). The duration of the dosage will depend on the problem and the response observed, always at the discretion of the veterinarian.
