

## BOOSTER® RN TERNEROS

### Oral Paste

First line of defense for newborn calves

### Formulation

Vit. A (Retinol acetate) 10 000 IU, Vit. D3 (Cholecalciferol) 4000 IU, Vit. E (Alpha tocopherol acetate) 0.200 g, Vit. B12 (Cyanocobalamin) 0.015 g, Vit B9 (Folic acid) 0.0009 g, Zinc gluconate 0.047 g, Copper gluconate 0.014 g, Cobalt gluconate 0.004 g, Iron gluconate 0.089 g, Sodium selenite anhydrous 0.001 g, Lactoferrin 0.200 g, Lactoperoxidase 0.250 g, Probiotics 0.200 g, cattle Colostrum 7.500 g, Dehydrated pasteurized egg 5.000 g, Inulin 0.500 g, Fructo oligosaccharide 0.300 g, Dextrose monohydrate 1.000 g, excipients 30 mL.

### Indications

Its administration as first line of defense, immediately (after birth), stimulates appetite and provides adequate health conditions encouraging and optimizing early ingestion of maternal colostrum and preventing failure of passive transfer (FPT). It contains a source of living rumen organisms, producing lactic acid (probiotics) and prebiotics that help the proper development of the intestinal environment of the newborn.

### Dosage and Administration

1 syringe in newborn calves. Administer one additional syringe at two dosages (15 mL each dose) at 6 and 12 hours after the first application. Administer through oral route.

### Commercial Presentation

Box x 4 syringes x 30 mL,
