

# **PENTA-HYPNOL®**

# Injectable Solution

General barbituric anesthesic

### **Formulation**

Pentobarbital sodium 65 mg, excipients q.s.ad. 1 mL

#### **Indications**

Short-acting barbiturate anesthetic. Depending on the dose, it induces sedative, hypnotic and general anesthesia effects in small species (surgical procedures lasting up to 2 hours). As sedative or hypnotic in big species. In overdose it can be administered as euthanasic. Also indicated for handling convulsive states caused by poisoning, puerperal eclampsia, epilepsy, among others.

# **Dosage and Administration**

Dogs and cats: 1 mL/2.5 kg of b.w.; cattle and horses: 1 mL/15 to 65 kg of b.w.; pigs: 1 mL/2.5 kg of b.w.; goats and sheep: as sedative or inductor of anesthesia: approx. 24 mg/kg of Pentobarbital sodium, with a range of 11 - 54 mg/kg. Apply through intravenous route.

#### **Commercial Presentation**

Bottle x 50 mL,
